

 **Timco**
TIMCO WOOD TRADING LTD

SOLUTION FOR OUTDOOR LIVING

Welcome to TIMCO WOOD

We have spent years as a manufacturer perfecting the natural wooden look for our composite products in order to provide a sustainable WPC alternative.

As a manufacturer we can work along side you to design a board that fits your requirements.

Timco Wood solid composite materials provide strength and endurance against weathering.

Our current decking range comes in variations of boards and sizes, available in multiple colours.

As you will see, Timco Wood products are suitable for both small and large projects.

This project in **Baltimore Wharf in London** involved the installation of countless balconies to give a refined mirror effect.

Our products are **environmentally friendly** being made from 60% responsibly sourced wood (FSC® 100% certified) and 40% reclaimed salvage high density polyethylene plastics with bonding additives.

Being **barefoot friendly** and high **slip resistant** you can ensure safety with every step whether is for your customers or family.

From our **rot free** decking to the security of our **low maintenance** product range, we offer reliability throughout.

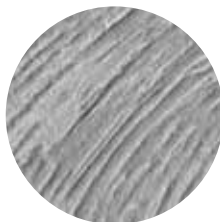

Timco Wood decking is proven to be easy to install.
You can do it by yourself!

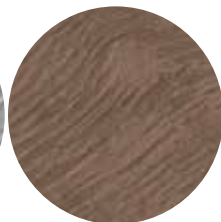

If you like the perfect mix of modern day style and tradition then our **HERITAGE DECKING BOARDS** are professionally engineered for you

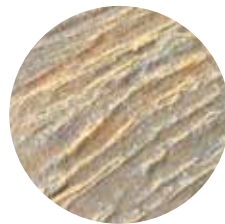

DRIFTWOOD

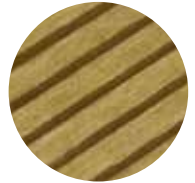

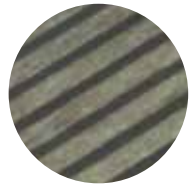

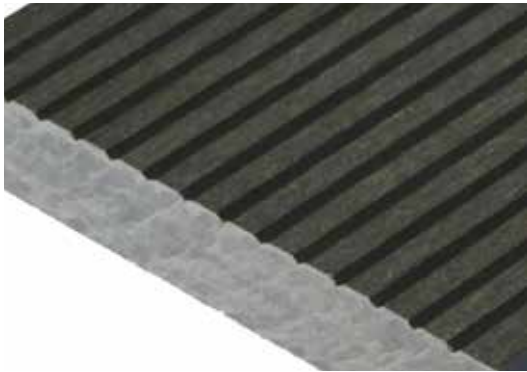

CEDAR

OAK FUSION

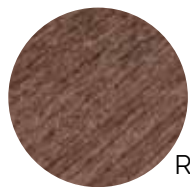

Grey

Ebony

Teak

Redwood
